SUMMARY

Creative and fast-paced Full Stack developer with 3 years of experience, with a good eye for visual and user interface design. I build responsive, user-friendly web applications from the ground up and enjoy solving tough problems along the way.

In addition to development, I have strong hands-on experience with Linux systems from managing user permissions and server configurations to SSL setups and overall system maintenance. I'm comfortable handling both the application and the server side to ensure smooth, secure deployments.

EDUCATION

Bachelor of Computer Information Systems - *Expected August 2026*
Al al-Bayt University

EXPERIENCE

UGC-Gaming.NET - *Remote Full Stack Developer & Linux Administrator* - **Sep 2022 – Jan 2025**

- Developed and maintained a wide range of internal tools and systems to support staff operations, boosting efficiency and security across departments.
- Built a full staff area system from scratch, helping the team complete tasks faster and in a more organized, advanced way.
- Maintained and managed all Linux-related infrastructure including server configuration, file management, network setup, SSL certificates, and DNS/domain handling.
- Updated all company websites using modern, maintainable code to enhance performance, security, and scalability.
- Led the staff team, improving communication and coordination to ensure smooth project delivery and day-to-day operations.

PROJECTS

- **Staff Area System**: Built to help staff and employees manage tasks more efficiently while providing fast, secure access to database for better oversight and accountability.
- **Bans System**: Built to help community members easily keep track of their own and others ban records - including details such as the reason, issuing administrator, date, server, and ban expiration time.
- **Remote Shell Bot**: A Discord bot built with Python that establishes secure SSH connections to remote servers. Allows authenticated users to send commands, receive output in real time, and safely close the session when finished.

SKILLS

Programming Languages: PHP, Python, JavaScript
Web Technologies: HTML, CSS
Database: SQL

LANGUAGES

Arabic: Native
English: Proficient
